

Nebu~Flow is unlocking the delivery of the next generation of inhaled drugs for patients with respiratory disorders, the main cause of death and disability worldwide.

Nebu~Flow is comprised of a team of passionate technologists and experts in the respiratory drug delivery with a vision to develop the next generation of nebulisers for inhalation drug delivery.

We are looking for a **Project Manager** to join and work with our engineering and development team who focus on hardware, product design, microfluidics, electronics and testing.

This role is a **permanent position** and can offer hybrid arrangement to work from home and our Glasgow office in the city centre.

Key responsibilities of the role: -

- Responsible for collecting, collating and presenting project data in a clear way for communication to partners at all levels.
- Organising regular project and team meetings, focusing design teams on program milestones and unblocking technical issues by pulling together the multi-functional technical expertise to resolve the issues.
- Communicate meeting notes and actions; follow up with responsible owners.
- Track and effectively communicate project schedules and milestones both internally and externally
- Prepare financial plans and forecasts for existing grants and grant funding applications
- Work closely with consultants to ensure timely and successful delivery of project goals
- Participate in technical discussions and work with the team to pull together scoping, schedules, and solutions to issues.
- Promote continuous learning and improvements.
- Demonstrate leadership and be comfortable navigating through challenging situations, juggling various priorities and managing constraints.
- Experience with quality management systems (e.g. ISO13485, ISO9001) is desirable
- Knowledge of Health and Safety procedures in a laboratory setting is desirable .

We have a great story to tell and would love you to be a part of our continued success. Below is a brief overview of 2022 and if you are curious then please send us your CV and we will look forward to chatting with you soon!!

Nebu~Flow highlights from 2022!

- 🎉 Celebrated 2 years of [Nebu~Flow](#)
- 👥 More than doubled the [Nebu~Flow](#) team throughout 2022
- 💡 Accelerated our prototype development process
- 🏢 Moved office/laboratory space to Glasgow city centre
- 🎓 Attended the [Drug Delivery to the Lungs \(DDL\)](#) conference and presented a poster highlighting our technology
- 📄 CEO, [Elijah Nazarzadeh](#) and Chairman, [John Pritchard](#) were published in [ONdrugDelivery](#) Issue #140
- 👉 Secured £1.7m funding from a brilliant group of investors: [Foresight Group](#), [WAE](#), [Science Creates Ventures](#), [SIS Ventures](#), [Ascension Life Fund](#)
- 🎁 Received a further £1m funding from the [Innovate UK](#) Biomedical Catalyst Award

The team are incredibly thankful for all the support this year and are looking forward to what 2023 brings, will you be a part of this amazing success?
